PROFESSIONAL SUMMARY

Senior Technical Writer with 15+ years of experience in producing end-user documentation, online help systems, UI microcopy, and product content for software across banking, cybersecurity, and enterprise IT. Have led documentation teams, managed multi-project workloads, and collaborated closely with developers, architects, product managers, and QA. Background includes structured authoring, content reuse, style guide development, and localization coordination.

CORE SKILLS

Documentation: User guides, API docs, installation & configuration manuals, release notes, online help (context-sensitive), video tutorials, style guides

UX & Proposals: UI microcopy, error messages, tooltips, screen flow guidance, RFIs, RFPs, solution documents, bid proposals, case studies, marketing collateral

Tools: Adobe RoboHelp, RoboSource Control, MS Office Suite, Adobe Photoshop, SharePoint, HTML, Jira, Confluence, WonderShare Video Editor, GIMP, Markdown

Content Strategy: Content reuse, template design, documentation planning, version control, localization coordination

Leadership: Team management, mentoring, project scheduling, peer reviews, stakeholder communication

Methodologies: Technical content writing, structured authoring, QA process documentation, ISO certification support

PROFESSIONAL EXPERIENCE

Senior Technical Writer | Underwriters Laboratories (UL Solutions) | Nov 2021 – Dec 2022

- Worked within an Agile/Scrum framework, participating in sprint planning, standups, and reviews to align documentation deliverables with product release cycles.
- Developed user-facing content across multiple product touchpoints, including product names, UI labels, navigation elements, automated emails, and system notifications.
- Partnered with cross-functional teams of designers, researchers, product managers, and engineers to align content with product direction.
- Authored online user guides for the UL SafeCyber platform and produced video tutorials for end users, managers, and the marketing team.

Lead Technical Writer | Wipro Technologies Ltd. | Jun 2012 – Mar 2019

- Authored and reviewed RFI, RFP, solution documents, and marketing presentations in collaboration with Pre-Sales, Solution Architects, and SMEs.
- Edited bid-related content for grammar, style, technical accuracy, and alignment with corporate documentation standards.
- Built and maintained a reusable content library, reducing document creation time and improving consistency across deliverables.
- Created and applied standardized templates for bid and proposal documents across the global infrastructure services division.
- Designed graphics and presentations to communicate complex infrastructure concepts to non-technical audiences.
- Developed detailed case studies by gathering input from Sales, Delivery, and technical teams.

Lead Technical Writer | CustomerXPs Software Pvt. Ltd. | Jun 2011 – May 2012

- Established the company's first corporate style guide and documentation templates, delivering consistent branding and terminology across all product documentation.
- Authored end-user documentation including installation manuals, configuration guides, web-based user guides, administration guides, and release notes.
- Coordinated with the Release Management team to deliver documentation on schedule for each product release.
- Gathered and incorporated user and consultant feedback to improve documentation quality and usability.

Team Lead / Technical Writer | Financial Objects Pvt. Ltd. (TEMENOS) | Jul 2004 – Feb 2011

Founding member of the documentation team at the Bangalore Development Centre; grew the team from one to five technical writers.

- Led end-to-end documentation for four major banking software products: IBIS, ActiveBank, Energy Credit, and a Wealth Management platform.
- Managed the documentation lifecycle for each project: requirements gathering, project planning, work delegation, writing, peer reviews, and final distribution.
- Wrote and maintained user guides, installation manuals, configuration references, release notes, and context-sensitive online help.
- Supervised, mentored, and evaluated six technical writers; supported professional development and ensured documentation quality standards.
- Coordinated localization with external translators for French, Swedish, and German versions of product documentation.
- Assisted development teams with UI microcopy including error messages, tooltips, and screen flow recommendations.
- Supported QA team in preparing process documentation for ISO certification.
- Set up and maintained the SharePoint documentation intranet and contributed to corporate internet content.

Technical Content Developer | Hotriya Technology Services | Jul 2003 – Jan 2004

- Developed web-based tutorials and reference material on technical topics, such as 802.11 networking, Linux, and Visual FoxPro 8.0.

EDUCATION & CERTIFICATIONS

Bachelor of Arts (B.A.) — Delhi University
